

Seasonal Preventative Maintenance

Let Stinson Air take care of your annual seasonal maintenance for your air conditioning system. Here's 3 of the main reasons why:

WHY IS IT SO IMPORTANT FOR YOUR AIR CONDITIONING SYSTEM?

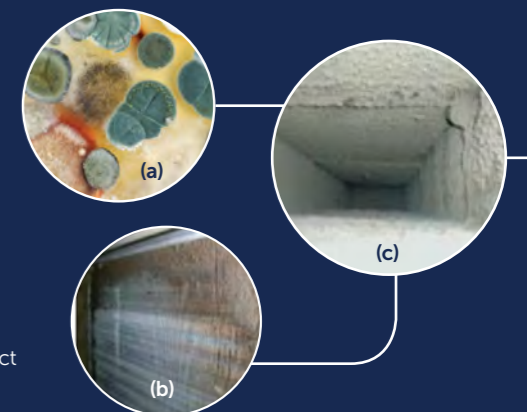

Energy efficiency and minimising the impact on your electricity bill.
A system that is not properly maintained with dirty filters, condenser and evaporator coils has vastly reduced performance and massively increased running costs. For example an outdoor condenser that is 10% blocked with dust and leaves will lose approximately 10% efficiency from your system, which will cost approximately an extra 10% to run.

Extend the life of your system.
All too often we have past clients that neglect their system with no maintenance and then 5 - 7 years post install, after the warranty has lapsed we have major breakdowns. The reason for most of these breakdowns is because the system is working harder than it should due to a lack of seasonal maintenance. With proper maintenance a systems life span should be well over 15 years.

The health of your home and family.
Without proper maintenance bacteria and mould can form inside fan coil units, condensers, drain systems and drain pans as well as in air filters. Without correct cleaning and replacement of air filters when required you can be circulating, dust, mites and bacteria throughout your home.

(a) Mould (b) Mould inside air conditioner (c) mould inside duct

HOW TO REGISTER FOR OUR SEASONAL PREVENTATIVE MAINTENANCE

Call the team at Stinson Air and we can add you to our seasonal maintenance calendar - no contract - obligation free.

Jump on our website, click the contact us page, fill in your contact details and request 'Please add me to the Stinson Air Seasonal preventative maintenance calendar. Then we will contact you and confirm your details.

Fill out your maintenance request form and post or email it back and we will take care of the rest. Don't have a form? Let us know and we'll get one to you straight away.

Help reduce your energy usage, prolong the life of your system and keep your home and family healthy.

Comprehensive annual seasonal maintenance visit - Ducted system

WHAT'S INCLUDED?

- Yearly reminder/automatically book your service
- Clean return air grille and filter
- Hose out condenser coils, and clear coil obstructions.

WHAT IS GELAIR?

It's the simplest way to stop mould and bacteria that infest your air conditioner and the room it services. Australian grown and distilled Tea Tree Oil is the main ingredient in Gelair™ products. Gelair uses only the finest Tea Tree Oil in its products, with every batch meticulously tested for quality.

Australian Tea Tree Oil is a powerful broad spectrum anti-microbial and anti-fungal agent, killing mold and bacteria (including Legionella) and viruses.

Your health is a priority. That's why the Gelair range of environmentally friendly, natural products help to prevent health effects caused by harmful micro-organisms such as allergies and respiratory illnesses.

Gelair
Gelair Pty Ltd

BENEFITS OF GELAIR

- 1 100% natural Australian Tea Tree Oil.
- 2 Simple to install. Needs no additional energy to operate. Lasts up to three months.
- 3 Kills mould and stops their odours.
- 4 Kills bacteria with no resistance issues (including Legionella) and stops their odours.
- 5 Stops the replication of viruses (including HSV & H1N1).
- 6 Treats the air, the ducts and the room - called 360-degree treatment.
- 7 Results in clean air and happy occupants.

OPTIONAL MID YEAR MAINTENANCE VISIT

Mid year filter and condenser clean option - Ducted system

Want to make sure your system gets proper care in between annual visits and can't trust yourself that you will remember to give your system some love? Add a mid year service to your maintenance program and sit back and relax.

- 6 Monthly Reminder
- Deodorize Fancoil
- Wash Filter
- Wash Condenser
